Type*	Installation dimensions (mm)	Net surface	Capacity (m ³ /hr)	Pull force	Stroke length
-------	------------------------------	-------------	-------------------------------	------------	---------------

*The WVH-RP can be composed from all Optiflex wall inlets in combination with side window panels (both with or without blackout system). Due to the high number of variations in the combi panel WVH-RP, no recommended types are featured on this page. These are tailor-made for each project. Contact us for more information.
