

COUNTER ROTATING VALVE SK

- ✓ Made entirely of plastic and stainless steel
- ✓ Stepless adjustable from 0-100%
- ✓ Easy assembly
- ✓ Flexible dimensions
- ✓ Modular system

A good climate in your barn is the basis for healthy animals and optimal performance. By far the most climate problems in the barn are caused by the inlet of the air. Wind influences play a major role here. With the Scan-Air counter rotating valve you have the right valve to minimize these wind influences and to control the air intake perfectly.

The counter rotating valve can be equipped with a direct motor drive. If several valves are mounted besides each other, the valves can be equipped spring opened or spring closed. Then one central motor can operate the valves at the same time. Per barn is checked which type and which size is suitable for the situation in question. In this way the system is made entirely according to your wishes and to the welfare requirements for your animals. The Scan-Air counter rotating valves are made entirely of plastic and stainless steel, which guarantees a long life. For every application we can make a valve.

Type	Installation dimensions			Net surface (cm ²)	Capacity (m ³ /h r)			Pull force (kg)	Stroke length (mm)
	W	H	D		10 Pa	20 Pa	30 Pa

Height:	Width:	200-2000mm (each step possible)
Depth:	Depth:	100-500mm (in steps of 25mm)

About Scan-Air

Scan-Air is a leading manufacturer in the field of ventilation, daylight, and pop-hole systems. For over 25 years we are producing high quality products with our advanced machinery and our dynamic organization.

Characteristic of Scan-Air's products is the use of a well thought-out building system, which enables us to offer a suitable solution for every application. The use of plastic and stainless steel materials guarantees a long lifetime.

Scan-Air offers a complete package of ventilation, daylight, and pop-hole solutions. With our knowledge and expertise in these fields, we can design the suitable total concept for your barn.
